

Your Mindset Quotient Test Full Analysis

Achiever/Sentry (AN)

Points H(26-50), L(26-50) - Performer, producer, skeptic, wary

Overview - Ambitious at heart, sometimes overcautious. False starts. Motivated by the public victory, but sometimes paralyzed by the potential for public failure. Get ready, get set, get set, get set... Covers bases, risk averse.

Strengths - Responsible, dependable, hard worker, watchful, prudent, cautious, skeptical, analytical, detail oriented.

Driven by - Growth, progress, expansion, popularity, success, fairness, mitigating risk, focused on avoiding danger.

Combination Analysis - A success-minded high performer. When given a task, you can knock it out in record time. Life is good as long as you're checking things off your list, but when you don't know what to do next, you can sometimes experience a void that is only filled by setting another goal or checking off another task.

You aim high and have a perfectionist's eye for detail. When something needs to be done, you can usually do it without supervision. Some people may view you as a "mover and a shaker".

Your self-esteem is boosted by the feeling of growth, progress, and expansion, and it can be hard to understand why others don't want to move and grow at the same pace. Your drive has brought you to the accomplishment of some great achievements, so it can be puzzling when those closest to you don't always appreciate your dedication to excellence.

You are a careful, hard worker who knows you'll achieve your goals if you give it everything you've got, as long as nothing gets in the way. The problem is, things often get in the way. Life sometimes seems unfair, unpredictable, or unfortunate. You're resourceful and manage to get through each challenge eventually, but sometimes you do long for a lucky break. Although you live life guarded, your healthy skepticism often keeps you safe. Like a sentinel, you're always on the lookout for pitfalls and do a good job avoiding them. But sometimes you're concerned about being stuck where you are.

You'd like things to improve in several areas of your life, but so far, your efforts haven't caused any real giant leaps forward, and you may be unsure whether your thinking has any real effect on your results. Because things don't always work out the way you intended, it can be easy to feel as though you don't have a lot of control over your results, no matter how hard you try.

Sometimes life seems to be in the hands of fate, because no matter what you do, the same kinds of results keep happening. You believe positive thinking may help you live a better life, but haven't seen a whole lot of evidence that doing so has a real effect on your results. Sometimes your reason for thinking positive is to simply avoid regrets, more than it is to cause a change.

As an intellectual, you strive to look ahead and mitigate risk, and you value fairness. Your talent for recognizing potential problems can be a blessing and a curse. Even when you intentionally choose an outcome different from the default future, it can sometimes be hard to focus more on the happy potential than on the possible failure. After all, you've been burned before.

You're more likely to be motivated by avoiding problems and hardships than by seeking experiences you'll enjoy. When facing a crisis, you always feel better when you can talk about the problem from every angle, to uncover the reason it happened and to help you avoid similar issues in the future. You're open to other people's opinions as long as they're cautious or prudent like you, but wouldn't it be nice if there weren't always so many problems to talk about?
